Market and Company Commentary

- European and US loan markets once again generated a solid total return in May returning 0.42% and 0.52%, bringing year to date returns to 2.59% and 3.06%, respectively⁽⁹⁾. In Europe, the reopening theme continued to benefit markets with retail sales and manufacturing recovering strongly, alongside an increase in Euro-area consumer confidence⁽¹⁰⁾. US loan performance was driven by CLO creation and heavy retail inflows on the back of inflation concerns and attractive relative value versus other fixed income assets⁽¹¹⁾. Loan default activity was also benign, with no new defaults recorded in both US and European loan markets⁽¹²⁾.
- In the underlying European loan portfolio, CCC and reopening-focused issuers continued to dominate performance. CLOs also opportunistically repositioned risk into market strength, focusing on minimising capital impairment. European CLOs trimmed lower spread paper trading at low yield to call, switching into higher spread assets in primary which increased both spread and par. Themes in the US CLOs were similar, where we have focused on rotating up in spread, also deploying capital from paydowns into the very active loan new issue market in deals where we thought relative value was attractive.
- Year to date CLO supply remains well ahead of previous years, with strong CLO creation continuing to support the loan market technical. Despite continued heavy CLO issuance volumes, spreads for new issue US BSL CLO tranches were mostly tighter in May, though in Europe, European BSL CLO tranche spreads have begun to widen under the pressure of the heavy supply. Year to date through May, total CLO volumes in Europe are nearly double versus the whole of 2020 at €44 billion, with 72% of this accounted for by CLO refinancing and resets⁽¹³⁾.
- During May, the Company priced one US new issue CLO called Point Au Roche Park. As reported in Creditflux, the transaction led the US CLO market tighter at pricing (28 May) with AAA spreads printing at L+108 basis points. This was the tightest AAA spread for a five-year reinvestment deal since Tallman Park CLO (priced on 19 March), which is another Blackstone CLO held in BCF⁽¹⁴⁾, once again highlighting the market’s recognition of Blackstone Credit’s strength as a CLO manager.
- The Company also invested \$10.1 million in the first loss of a new US CLO Warehouse which is expected to price within the third quarter. Additionally, the decision was made to call the Orwell Park CLO, which was economically favourable when compared with the option of a reset. Calling the transaction will return capital to the portfolio, which will ultimately be allocated towards more efficient uses to potentially enhance the return profile of the Company.

BGLF Investment Objective

- BGLF's investment objective is to provide shareholders with stable and growing income returns, and to grow the capital value of its investment portfolio by exposure to European and US floating rate senior secured loans and bonds, both directly and indirectly. The Company achieves its investment objective solely through its investment in Blackstone Corporate Funding ("BCF")⁽¹⁵⁾, which is an investor in global floating rate senior secured loans.
- BCF funds its investment in European and US loans using a variety of funding sources, including equity capital, its 3-year syndicated financing facility, notes issued to the Company, and non-recourse leverage obtained from retaining Income Notes in collateralised loan obligations ("CLOs") that BCF has established.

- (19) US CLO Warehouses may have an additional third party first loss provider invested alongside of BCF.
- (20) Orwell Park is in the process of being redeemed. The residual position is reflective of one remaining equity distribution to be made.
- (21) Position as a percent of tranche represents the percentage ownership of Blackstone CLO Management LLC ("BCM"), in which BCF is invested and owns 100% of Series 2 and Series 3 of BCM through its PPN investment in BCM. On 1 July 2020, Blackstone / GSO US Corporate Funding Ltd. ("BGUCF") was merged into the BCM, at which time 86.02% of the BCM's ownership of BGUCF, of each asset was transferred to BCM. As this resulted in BCM holding less than the majority of certain CLO positions, BGM has since purchased a small amount of these CLOs in order to maintain a majority economic position in each CLO investment.
- (22) The vertical retention investment in Tallman Park CLO is financed by a repurchase agreement. BCF owns 5% of each tranche (including equity). The total position owned is reflective of the gross exposure less the financed amount.
- (23) Warehouse Investment is calculated as the cumulative trade date USD proceeds and equivalent EUR proceeds utilised to fund each warehouse.
- (24) The Current Loan Exposure for the CLO Warehouse Investments is reflected on a trade date basis while the Investment amount is reflected on a settlement date basis.

Key risk factors as determined by the entities distributing this communication

All investments are subject to risk, including the loss of the principal amount invested. Past performance is not necessarily indicative of future results, and there can be no assurance that BGLF will achieve comparable results, will meet its target returns, achieve its investment objectives or be able to implement its investment strategy. All investments to be held by BGLF involve a substantial degree of risk, including the risk of total loss. The value of shares and the income from them is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment you may get back less than you originally invested. You should always seek expert legal, financial, tax and other professional advice before making any investment decision.

Material changes impacting the Company's business. Material changes affecting global debt and equity capital markets may have a negative effect on the Company's business, financial condition, results of operations, NAV and/or the market price of the Shares. Unexpected volatility, illiquidity, governmental action, currency devaluation or other events in the global markets could impair the value of the Company's investments and could cause some or all of the Company's investments to incur substantial losses.

Investment strategy risk. Market factors may result in the failure of the investment strategy. Strategy-specific losses may result from excessive concentration by multiple market participants in the same investment or general economic or other events that adversely affect particular strategies (for example the disruption of historical pricing relationships). The investment strategy employed by the Company is speculative and involves substantial risk of loss in the event of a failure or deterioration in the financial markets.

Risks associated with fully subordinated investments. The Company is exposed to the most subordinated tranche of a CLO and all payments of principal and interest on such CLO income notes are fully subordinated. In addition, investments in loan warehouses are expected to be the most subordinated tranche of debt issued in the loan warehouse. CLO income notes and certain investments in loan warehouses are volatile, and Interest and principal payments in respect of such investments are based on residual amounts available, if any, to make such payments, and accordingly interest and principal payments payable on such instruments are not fixed.

Nature of the loans and bonds. The CLOs in which the Company is invested will commonly invest in a portfolio of loans and bonds consisting at the time of acquisition of senior secured obligations, unsecured senior loans, second lien loans, mezzanine obligations and high yield bonds, as well as certain other investments, all of which will have greater credit and liquidity risk than investment grade sovereign or corporate bonds or loans. The lower rating of below investment grade collateral reflects a greater possibility that adverse changes in the financial condition of an obligor or in general economic conditions or both may impair the ability of the relevant obligor, as the case may be, to make payments of principal or interest. Such investments may be speculative.

Discount to NAV. The Shares may trade at a discount to the Net Asset Value per Share (of the relevant class) and shareholders may be unable to realise their Shares on the market at the Net Asset Value per Share (of the relevant class) or at any other price. The discount may arise for a variety of reasons, including due to market or economic conditions or to the extent investors undervalue the Underlying Companies.

Valuation Risk. The Company's investments may be difficult to value accurately and, as a result, the Company may be subject to valuation risk. The Company is entitled to rely, without independent investigation, upon pricing information and valuations furnished by third parties, including pricing services and valuation sources.

Conflicts of Interest. There may be occasions when the Company and their affiliates will encounter potential conflicts of interest in connection with Blackstone's activities including, without limitation, the allocation of investment opportunities, relationships with Blackstone and its affiliates' investment banking and advisory clients, and the diverse interests of investors.

Epidemics/Pandemics. Certain countries have been susceptible to epidemics which may be designated as pandemics by world health authorities, most recently COVID-19. The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, has had and will continue to have a negative impact on the economy and business activity globally (including in the countries in which the Company invest), and thereby is expected to adversely affect the performance of the Company's Investments. Furthermore, the rapid development of epidemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Company and the performance of its Investments.

Blackstone undertakes no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

Highly Competitive Market for Investment Opportunities. The activity of identifying, completing and realising attractive investments is highly competitive, and involves a high degree of uncertainty. There can be no assurance that the Company, through its investment in BCF, will be able to locate, consummate and exit investments that satisfy its objectives or realise upon their values or that the Company will be able to fully invest its capital. There is no guarantee that investment opportunities will be allocated to BCF, and in turn the Company, and/or that the activities of Blackstone's other funds will not adversely affect the interests of such Company.

Material, Non-Public Information. In connection with other activities of Blackstone, certain Blackstone personnel may acquire confidential or material non-public information or be restricted from initiating transactions in certain securities, including on a Company's behalf. As such, the Company may not be able to initiate a transaction or sell an investment. In addition, policies and procedures maintained by Blackstone to deter the inappropriate sharing of material non-public information may limit the ability of Blackstone personnel to share information with personnel in Blackstone's other business groups, which may ultimately reduce the positive synergies expected to be realised by the Company as part of the broader Blackstone investment platform.

No Assurance of Investment Return. Prospective investors should be aware that an investment in the Company is speculative and involves a high degree of risk. There can be no assurance that the Company will achieve comparable results, implement its investment strategy, achieve its objectives or avoid substantial losses or that any expected returns will be met. The Company's performance may be volatile. An investment should only be considered by qualified investors who can afford to lose all or a substantial amount of their investment. The Company's fees and expenses may offset or exceed its profits.

Reliance on Key Management Personnel. The success of the Company will depend, in large part, upon the skill and expertise of certain Blackstone professionals. In the event of the death, disability or departure of any key Blackstone professionals, the business and the performance of the Company may be adversely affected.

Please refer to the BGLF prospectus and most recent annual or interim reports for additional information on risk factors.

Important Disclosure Information

Important notice in relation to Blackstone Loan Financing Limited ("The Company" or "BGLF"):

This document has been issued by Blackstone Loan Financing Limited (the "Company"), and should not be taken as an inducement to engage in any investment activity and is for the purpose of providing information about the Company.
